

CrystalClear[®]
CHLORINATORS

SEMI-COMMERCIAL CHLORINATORS

"Commercial chlorination made simple"

SC160 to SC200

Automatic self-cleaning cell

Advanced microprocessor control unit with easy to use LCD interface

Efficient switch mode power supplies

Liquid cooled power supplies using heat exchanger technology

High-Quality lubrication free valves with the option for full automation

PWM (pulse-width modulation) controlled power supply for accurate and efficient chlorine production

Proven cell configuration incorporating the very best available titanium substrate coated with mixed metal oxides

Designed to cater for swim schools, hotels and apartments

Salinity Range 3,000 - 36,000 mg/L

Simple retrofit install for existing pools

2 Year Full Warranty on the Power Unit and Cell Electrodes

High quality valves with
the option for full
automation

Utilising our proven cell
and electrode design with
MMO premium electrode
material
